do anything to break or disturb the political truce. The economic situation in France continues to worsen. The official unemployment figures have reached a height untouched even during the immediate post-war period. On October 20 the government was compelled to admit that there were approximately 340,000 officially registered as unemployed in France, in comparison with about 230,000 in the corresponding period of last year. The total capital issued continued to dwindle con-stantly. The fading confidence in France conomic stability is parti-cularly indicated by the fact that in comparison with 593 million frances in the same month of 1933. This is the worst in many years.

Mooney Appeal In Supreme Court

Once again a faint gleam lights the cell of San Quentin prison where Tom Mooney has spent eighteen years as a human sacrifice to the gods of wealth. The United States Supreme Court has issued a writ asking that California show cause why the Court should not review the Mooney case. Freedom for America's most

# **Imperialist Intrigue Grips** London Naval Confab

It has been a long time since an rounding these confabs simul-international conference has so taneously tends to hide and em-clearly evidenced the unbridgeable phasize the basic conflict of chasm among the leading imperial-

interests. Japanese imperialism is seeking to secure a navy of world dimen-sions in order to enhance its pres-tige on the Asiatic mainland and to fortify its position, particularly in China, at the expense of other imperialist groups, and of course, against the Chinese people. British imperialism is striving to maneuver the United States into a position in which there will be an open, violent conflict between American and Japanese intreests. In this conflict Loumbard Street hopes to play the role of the "benevolent neutral" with all the tenevolence in the interest of the Bank of England and all the "neutrality" at the expense of Wall Street. In other words, John Bull is manipulating so that he can play the role that Uncie Shy lock played in the last war.

Steel Workers: Company unionism has grown by leaps and bounds in the steel mills. Splits and secession weaken your union and strengthen the company unions of the steel barons. Wall Street spokesmen in this conference sense the danger; they fear a deal will be made be-hind their backs between Japan and the British; they are striving to underscore the conflict over markets between Japan and Bri-tain; they are especially afraid of some concessions being made by Japan to British heavy indus-try as indicated in the forty mil-lion dollar deal reported to have been concluded by the Federation of British Industries with the Manchukuo blotter government. How worried Uncle Sam's diplo-mats are can be gauged by the fact that they are having their press agents lay down repeated gas barages about the horrible consequences which would flow out of a rupure of friendly relations between "the two great English-speaking nations," the Anglo-Saxon peoples,-the "Cnosen Peo-ple of the Twentieth Century." These are the questions that the Washington-wise are asking these days as the greatest anti-union of tensive is getting under way in carefully planned and bitterly de-carefully planned and bitterly de-termined fashion. To mask Unionism! Within the inperialist triangle how in commotion in London there are to be found the most explosive cotradictions and the most poison-ous infections plaguing interna-tical capitalism. At this writing it appears almost certain that the three ends of the triangle will agree to disagree, will agree to stay apart. It is precisely in the soil of such "agreement" and in the atmosphere of such disagree-ment that the germs of imperialist war flourish.

# Another American Centrist Still-Birth

Based on an historically incor-rect analysis of the role of the Communist International today, inbued with a false Americanism borrowed in toto from the Amer-ican Workers Party, but without rooting itself in the soil, the tradi-tions and the peculiarities of the American working class, with a Trotskyite approach to the Soviet Union and to the colonial problem, for a united front-but not from below and not from above, openly proclaiming a dual unionist policy, we find that the much ballyhooed itself and the Mustelite and forth what we venture to predict will be a still-brth, the Workers Party of the U. S. A The Militant of Oct. 27, 1933, prints in tuil the "first draft of the joint programmatic statement is-ued by the Negotiating Commit-tees of the Communist League of America and the American Work-ers Party."

# A Program of Centrist Reformism The Program of the W.P. be-trays its reformist, centrist charac-ter. On the very basic principles of the Communist, the revolutionary, working, dass movement—itmed the Communist, the revolutionary, working class movement—armed insurrection, dictatorship of the proletariat, Soviet power, Soviet Union as the workers' Fatherland, as well as on the evaluation of the Communist International and the Social Democracy—the W.P. takes an equivocal and centrist stand. The revolutionary narty of the

# An Estimate of the Workers Party Program vious articles. Again we meet the same vague formulation. The work-ers are still left to founder about by the party that claums to be the leader of the working class to find out what means are necessary "to defeat the capitalist government and to transter all power to the Workers Councis." The W.P. should speak trankly to the work-ers; it should state what other means it has in mind "to defeat the capitalist government."

# Dodging Clarity On Road '10 Power

Dodging Clarity On Road to Power Similarly, on the all-important question of the dictatorship of the proletariat and Soviet power, ques-tions which no one can consider in the realm of the academic, especially since the proletarian revolution in Russia in 1917, especially when we consider the ac-compaishments of the Dictatorship of the Proletariat in the Soviet Union during the last 17 years. Only those who turn their backs on Marxism-Leninism can fail to take an unequivocal stand for the D-catorship of the Proletariat. Only those who take a Centrist stand can offer the vague formula-tions—Workers State and Workers Councils, which can be interpreted by different workers in different ways. To the reformists the Work-ers State means a parliamentary government with the Socialist Party or the Labor Party as the leading majority party. Io many confused workers it might mean the collaboration of the various parties of the working class in the government, such as the C.P. and S.P. The Dictatorship of the Proletariat has a very definite meaning. Why does the W.P, evade taking a stand on this? Why does it not speak clearly? How is it that at a tame when workers through-out the world are becoming in-creasingly more friendly to the Dictatorship of the Proletariat on the basis of its most serious crisis, this new so-called "revolutionary party" hides behind a formulation that can mean anything and every-thing ? Communist International and the Social Democracy—the W.P. takes an equivocal and centrist stand. The revolutionary party of the working class must make vity class must make vity county in the stands unequivo-cally for armed insurrection, the about the overthrow of the capit is state. # Centinuing Trotskyist Anti-Soviet Stand

Continuing Trolskyist Anti-Soviet Stand It is especially on the question of the Soviet Union that the W.P. shows its true colors. Musteism and Trotskyism found common ground on this question. The Trot-sky theories of Thermidor and of National Bolshevism permeate the Program on this point. In fact the Thermidor theory has been ex-tended to the Communist Inter-national. The Program states, "The vise of fundamentally anti-Marx-ian nationalist tendencies and the abandonment of the principle of workers' democracy in the Third International and its sections con-stitute the source of their decline and impotence," (Emphasis Party of the Soviet Union, leader of the Proletarian Dictatorship, whose policies have been approved by the workers and peasants, is guilty of "anti-Marxian nationalist tendencies." WP Is For Civil War In U.S.S.R.

More than that, Trotsky, in the Militant of October 21, 1933, writes the following imaginary dialogue, with the answers of A being his own views:

"A. To speak now of the re-form of the C.P.S.U. would mean to look backward and not forward... In the U.S.S.R. it is necessary to build a Bolshevik

the-road position between the very and the S.P." But this is the very international move-ments, it will find itself sooner or later in the Social-Democracy. (Note-In the next issue of the Workers Age, there will be a sec-nd article dealing with the anti-Leninist and sectarian position of the W.P. on such basic questions as Fassism, the present objective situation, the colonial question, im-perialist war, suited front, Labor Party, and trade unionism).

"A. Right at the present mo-ment it is taking place . . . "

ment it is taking place ... " The Program tells us that it "pledges its support to those revo-lationists in the Soviet Union who fight for the revval of the Com-munist Party of Lenin's time, based on the principles of revolutionary internationalism and party demo-eracy," in other words, for those forces who are for civil war in the Soviet Union. And all this under the name of "defense of the Soviet Union." And all this under the slogan of restoring the C.P.S.U. to the "penciples of revolutionary internationalism." The Program then summarizes

internationalism." The Program then summarizes this point by one last slander on the Soviet Union by implying that the Soviet Union by implying that the Soviet Union depends upon the League of Nations, non-aggression pacts, etc., as though the Red Army were not a factor, as though the industrialization of the Soviet. Union will play no role, not to mention the part to be play-ed by the revolutionary workers of the various countries of the world. world.

#### Duplicity On Attitude to S.P.

Duplicity On Attitude to S.P. It is peculiar that this "party" says of the S.P. that it "is not a party of revolution but of reform-ism and pacitism. It is affiliated and gives allegance to the bank-rupt Second International which bears the responsibility for sup-porting the last imperialist war and whose leading section, the German Social-Democracy, openly aided the capitalists to suppress revolutionary uprisings of the workers and made possible the triumph of Fascism in Germany. ... The Party (S.P.) and the Second International with which it is affiliated therefore serve the pur-pose of preventing the consistent evolution of the workers to revolu-tionary Marxism." (Emphasis ours.) And yet the Trotsky groups in various European countries are entering and becoming an organic part of the Social-Democratic Par-ties, and we can expect in the future a similar development in the U.S. on the part of the Trotsky-Centrist Party, the W.P. In its Program the W.P. states that it "firmly oper the forma-tion of any centrist organization ... trying to occupy a middle-of-the-road position between the C.P. and the S.P." But this is the very thing that the W.P. is doing. But like other 2½ international move-ments, it will find itself sconer or later in the Social-Democracy. (Note-In the next issue of the

and freedom, and under the same banner the New York organization under the domination of the right wing refused them admission into the party. The National Commit-tee is forced to look around for friendly states that will carry out its decision!

The Declaration-On Ice

The Declaration—On Ice What is even more revealing is the remarkable haste with which the defenders of the organizational principle of democracy relegated to the ice-box the democratically-ar-rived-at-by-referendum Declaration of Principles. The referendum was hardly over before Norman Thomas announced in the New Leader, October 20, 1934: "The one thing we Socialists

innumerable lessons of the past, that organizational unity with the reformists leads to the dissolution of the revolutionary resoluteness of the working class, is again be-ing repeated. And, pray, what has become of democracy, which means the subordination of the minority to the majority?

#### Unprincipled Unity

to the majority? Unprincipled Unity How can a party following several different roads at once, and advocating contradictory principles, displaying organizational chaos in every action be in "glowing heath?" How can such a form of party "democracy" do anything put prevent a revolution, even granting correct principles, for the sake of argument? Is the "instru-ment of revolution," the Socialist Party, to quote the "Militant? for-mulation, to march into revolution-ary struggle against the bour-geoise in the States of Wisconsin and Michigan, while the "instru-ment of revolution" waits endless-ly in the States of New York and Premsylvania for the peaceful transition to socialism ? Or is the dictatorship of the proletariat to be set up in Georgia, while "bogus democracy" will be permitted to reign in Massachusetts? Is it not revident that there is not a gia.n of principledness or correctness in such organizational unity of op-posites? Yet such is the theoretic-al confusion, that the unity of Thomas, Hoan, Sinclairites, Kight Wingers, "Militants" and Revolu-tionary Policy Committee is a mat-ter of pride! And as they glory in their unity with chauvinists, they at the same time boast that Uprincipled than this unity of dorbid! Nothing could be more un-principled than this unity of the values of the dictatorship of the proletariat and enemies of the di-tatorship of the proletariat in one party: advocates of the revolution-ary path to socialism and support-ers of peaceful transition: the defenders of parliamentarism and the opponents of legalism and con-stitutionalism. With this they negate the very idea of a revolu-tionary party of the working class being the resolute vanguard of the working class united on a revolu-tionary party of the working class being the resolute vanguard of the working class united on a revolu-tionary bas travelled to a Marxist position is to break the unity with only principled course of a Social-ist who has travelled to a Marxist position is to break the unity with the reformists and to establish or-ganizational unity with Commun-ists with whom he agrees. No ap-peal to the principles of democracy can condone the refusal to separate from the reformists.

Engels On Separation From Reformists

From Reformists Such a principled position was advocated not only by Lenin, but two generations ago, Engels cas-tigated unity with the reformists, in a letter to Bebel in October H 1870, Attacking the advocacy of lawfulness and reforms by s Schramm, Hochberg and Bernstein, "In a petty-bourgeois country like Germany, such ideas cer-tainly can be justified-but out-side of the Social Democratic workers' party. If these gentle-men formed a social-democratic petty-bourgeois party, they would be perfectly within their cording to circumstances, etc. In a workers' party, however, they are a corrupting element." R. P. C. Confusion

olutionary Policy Committee, which, olutionary Policy Committee, which, of the various groups, has achieved the greatest clarity of principles, has freed itself of illusions in re-grand to separation from the re-formists and allying itself with the Communist movement. It relies on ill-founded hopes of reforming the Socialist Party and the Second International. In this it fails into the swamp of opportunisan on or-ganization questions, and in at-tempting to defend its position megates the role of the Party as the vanguard of the proletariat and the highest form of working class organization. It even compares the Party to a trade union it writes in the first issue of the Revolu-tionary socialist Review: "If trade unionists outside the SP can be won over to revolu-tionary socialist methem bers of the Socialist Party?" The argument for the revolu-tionizing of the trade unions is

must be-why cannot the memi-bers of the Socialist Party?" The argument for the revolu-tionizing of the trade unions is not an argument for the revolu-tionizing of the Social Democratic Parties as such. The trade unions are all-inclusive organizations of workers of diverse viewpoints and principles while a party includes only those subscribing to its prin-ciples. On the contrary, the rev-olutionizing of the trade unions is a powerful argument for the greatest revolutionary clarity of principle and resoluteness and discipline in action of the party of the working class, otherwise the party will not lift the trade unions to its level but sink to the backwardness and reformist level of the trade union struggle. Trotsky's Menshevism

#### Trotsky's Menshevism On Organization

Trotsky's Menshevism On Organization A s.milarly crude and fallacious analogy between the Social Demo-cratic Parties and the Labor Party is made by Trotsky as a justifica-tion for joining the party of re-formism. The Socialist Party is viewed as a federation of parties! And did not Lenin advocate that the British Communist Party should affiliate to the reformist Labor Party, asks Trotsky. Here again, Trotsky's Menshevism in or-ganization matters is apparent. The Labor Party is a bloe of labor organizations, mainly trade unions, based upon a minimum program. None of the affiliate parties give up either their organizational or programmatic identity. The Social-ist Party is on bloe of labor or porty by the membership. The Labor Party is only a bridge to higher revolutionary development of the masses. It will be left behind as the trade unions become rev-olutionized and throw their sup-ort to Communism. While, as Engels well said, a bloc with these bourgeois-minded reformists "according to circum-stances" is correct, whether in a united front or in a Labor Party, unity with them in one party means the destruction of all "proletarian resoluteness." A Discussion on t the Socialist Party as compared with the Communis Party in re-gard to the democracy to be found in their organization. "Freedom" is theirs, they boast. Reformists, flag wavers, Centrists, revolution-ists-all are to be found in the one organization, with freedom to do as they plense and to advocate diametrically opposed principles to the working class. This phenome-non, which represents a process of disintegration of the Social Democracy, and is a temporary and anomalous condition is held up by Socialisto of all shades as the apex the of development of revolutionary organization David Felix, for ex-ample, writing in the American Socialist Quarterly of autumn 1834 on a Program for Revolutionary Socialist, declares:

cialism, declares: "No matter how deplorable one may consider the present condition of the socialist par-ties—they are the picture of glowing health compared to the communits shambles. One notes tense ideological straggles in the Labor and Socialist Inter-national . . . " (my emphasis \_R H )

# Have They Learned?

Social-Democracy has learned its lesson well, declared Ben Git-low, just before he crawled into the Socialist Party thru "the back deer". learned

low, just octore ne crawied into the Socialist Party thru "the back door." We read the interviews with and the speeches of Herr Gerhart Se-ger and Dr. Julius Deutsch, Ber Still Defending Democracy When in the heat of the heroic struggle in Austria, Julius Deutsch announced that it was not a revo-lution but a defense of democracy and the constitution, revolutionary workers were puzzled. Surely the man must see that bourgeois democracy is dead and that the armed struggle must be for prole-tarian rule! But the Rauers and Deutschs did not see. Too deeply ingranned had become their hatred of proletarian rule and their loy-alty to bourgeois democracy. They led their supporters to defeat their than meet the revolutionary needs of the moment. And now, the same Julius Deutsch informs us (Morld-Tele-gram-Nov. 2, 1931): "For defense. Thus it was with the Schutzbund, to defend democracy. We were not en-ranged in tevolution but in de-fense." How To Fight Fascism?

fense." Have they learned? Have to Fight Fascism? Despite all talk by Socialist lead-ers of resistance by the working masses to fascism, we find their main interest centered elsewhere. The unfinished wish of Herr Seger speaks volumes on their lack of con-fidence in the mass struggle against fascism. "If there were war against Germany..."

masses of Germany from Hitler's blody reign. And in this battle Herr Seger stands ready to be-come a loyal soldier. "There are those of us Ger-mans who have discussed the formation of a corps like the Czecho-slovakian legions in the last war," said Herr Seger, "a corps of Germans who would fight Hitler."

hght Hitler." And what are those glorious traditions of the Czecho-Slovakian legions which Horr Seger would inherit? The traditions of a mer-cenary band of counter-revolu-tionaries which did yeomen service for world imperialism against the red armies of Socialist Iussia. Has Herr Seger learned? Austria's Solution

Has Herr Seger learned? Austria's Solution Also in the case of Austria do we find that the strategy of the Social Democratic leadership (the Greign committee in Czecho-Slo-vakia) has its eyes turned in a direction other than proletarian revolution as the way out. In so many words (I have not the clipping at hand) Dr. Deutsch blandly states that Social-Democ-racy is working hand in glove with the government of Czecho-Slovakia to secure for Austria a status similar to that of the Saar Basin —a League of Nations inandate over Austria.

-a League of Nations imandate ever Austria. This leader of the now bankrupt Austro-Marxism sees nothing in-congrous in Social-Democracy's becoming a willing tool in the im-perialist intrigues of central Europe. Has Dr. Deutsch learned?

To Make The World Safe for Democracy Revolutionary workers and many in the ranks of Social-Democracy lock back upon the black treason of August 4 with dread and hor-ror. Never again, naive socialists

interposed Herr Seger. Once again then are socialist legislators supporting their bour-geois governments in war prepara-tions. But only "to defend their democracies" we are told. As if any bourgeois power has ever gone to war without the ery of "de-fense." As if it were possible to cut thru the maze of diplomatic intrigue to determine who is the offender.

# "Self-Annihilation" in **Negro Question**

It is a time of stock taking in the International today. False tac-tical methods of work (trade minoline, united front, etc.) are finally results, being overhauled and charged. Not thoroly and painless-ty, but piecement and painfully. The charge is nevertheless there, is another field of work also, which the CI generally and the American party particularly must re-examine of Negro work. That the party has made relatively little advance in winning Negroes to the revolu-tionary movement is apparent to those willing to face the facts. This in spite of the richest ob-piective possibilities existing in this pretion during the last 5 or 6 bistory of American capitalism, a crisis which came down, especially hard, upon the Negro masses. That work the Negro masses that work the self-determina-tion of the statical slogen of the party to the theory of self-determina-tion work that the main tendencies and novements amongst the Negro respondent would be hard to imagine this becoming more and more opparent to Party comrades, and of which seen be last to imagine the to the theory of self-determina-tion when the self-determina-tion of the theory of self-determina-tion work more stated to imagine the theory more fantast, crun-the theory more fantast, crun-the theory more fantast, crun-the theory of self-determina-tion over the theory of self-determ apparent to Party comrades, and especially Negro comrades, many of whom we know, are in dis-agreement with the self-determina-tion theory. Unfortunately, in the absence of an atmosphere con-ducive to full and free critical dis-cussion of Party problems, this feeling has been insufficiently re-flected in the ranks of the Party. For this added reason, and in a period approaching the 7th World Congress, an analysis of the theore-tical fallacies, as well as the disas-trous practical results of the self-determination theory becomes im-perative. The C.P.O. criticized the self-determination theory on its appearance. That criticism has been proven valid. It is time to restate the position.

# What Is This Self-Determination?

The C. P. and the Theory of Self-Determination

The C. P. and theory becomes immediately ap-parent when we consider the im-pucations of the meaning of a na-tion. For the iormation of a nation inter is necessary a community (and distinctness) of language, of territory, of economic like (a na-tional economy) of culture and tradition. Not a single one of these conditions is characteristic or the Negroes in the U. S. today. The Negro people form an integral element of the American nation and of the American national eco-nomy. Their language and culture are inseparable from American nevelopment, are absolutely in-digenous to American soil. The original African slaves did not by nar constitute a homogeneous mass. There were sharp differences among them as regards lan-guage, culture, economic organiza-ion, as well as geographicat orgin. The historical development was une wiping out of organiza-tion, as well as geographicat orgins of the sum as accomplished by the brutal hammer blows of slave oppression. The progressive-it a constigured common outclook, com-

by the brütal hammer blows of stave oppression. The progressive-ity acquired common outlook, com-mon traditions of the Negro masses is thus inseparable from American hatorical development. Intere is no homeland to look back to. Common traditional heritage points back only to an Amer.ca which was built by the blood and bones of the oppressed Negro masses. In this definite sense the Negro is an original American if there ever was one. Taking these facts into con-sideration one realizes how fan-tast.c is the expectation of strak-ing a burning response for separate nationhood in the ranks of the Negro masses. The idea of separa-tion both by colonization elsewhere, as well as upon American soil has a history of its own among the Negro masses. Let those who thaunt the seemingly destrable banner of "self-determination" learn from this history. Move-ments for separation on whatever basis were always fathered by the most reactionary and backward elements among the Negroes. The response gotten was at all times almost nil. And no wonder. There is no material basis for its realization. On the contrary, the drive in its most conscious form has always been and is in the op-posite direction, for the hammer-ing out of freedom on soil which is their own, which they developed, in a country which they developed. But it cannot be too sharply under-scored that they influence an in-finitesimally small number of Neg.cos (and in the South, which is supposed to be the geographical base for the rew nation-practical-base of the dev dest reactionary and backward elements in the Negro race today. Further since the self de-termination theory is predicated upon the geographical base of the "Black Belt," what about the North? Listen to the answer. Says Haywood (who steps in where angels icar to tread): "In the North the Negro Question is also a national ques-tion, having its roots, in the final analysis in the position of the Negro masses in Southern agriculture." How is that for geographical sleight of hand? Must one argue against such fantasies? Disastrous Results

Disastrous Results Of False Theory In the field of practical activity, willy milly in spite of the subject-ive destres of its proponents the "self-determination" theory can have only disastrous results. THE party line on the trade Tile party line on the trade union field appears to be tangled up in a pretty bad way. While denying indignantly that any change in the trade union line of policy appear, nevertheles, in the daily trade union work of the CP. We must also add that ne attempt has been or is being made to provide a theoretical premise for either of these two contradie-tory tactical approaches.

for either of these two contraints tory tactical approaches. In the honey-moon days of the recent dual-unionist wave (1929-30) the party line was "crystal clear." The existing unions of the A. F. of L. were company unions, fancist unions, they had merged with the expitalist state apparatus, they were holding back the great masses of radicalized workers from runking to communism. This was very clear to every loyal sup-porter of the party line. The task was equally clear—the organiza-tional unity of these unions must be destroyed and the radicitzed horages thus released were to be herded into the hrand new and revolutionary industrial unions. This was the apex of revolu-tionary wisdom. Were unto him whe did not echo these criss or who harbored treasonable doubts for hewas mercilessly cast out and dame. To the perdition of social-tioscient.

fascism. BUT today things are not so clear. The tremendous ex-tension of trade unionism, under the banner of the A. F. of L., mor-tally wounded both the theoretical foundation as well as the organ-irational super-structure of dual unionism. Its line cut to pieces by the hard realities of trade union developments and lacking the cour-age to call for a fundamental revision in its trade union course, the party leadership has lapsed into confusion worse counfounded. What are these two main lines of policy in evidence today? The liquidation of certain of the indus-tr al unions and the simultaneous attempts at the organization of new industrial unions. Both are

attempts at the organization of new industrial unions. Both are today the products of a bankrupt line.

THE industrial unions have been liquidated in the dress, to the (even the the "red flame" still flickers here and there) and in the mining industry. Even if ve grant that the aim of the CP members upon reducting to the we grant that the aim of the GP members, upon returning to the reformist unions, is the same, i.e. working for a new base for dual unionism-and from all indica-tions it is so, how does this liquida-tion square with the ponderous theories so painfully forced upon the communist movement? Are the unions less "fascist," less "company union" or less "merged with the capitalist state appac-tus"? tus

No wonder therefore that these minons were liquidated with very and explanations indeed. In the settile industry the CP suddenly discovered that the unity of the textile workers in accessary, in the reneral strike. And when isn't the unity of the workers in the unions mecessary? In Cooper Union, the silvertongued apostle of dual unionism—Ben Gold, told the few dree makers who came to listen to him, that only now is it correct to liquidate because a year ago the industry. How and why was this position least? In the case of the merer not even a lame excuse is to be found. Only the statement of Jack Statebeth that the CP members should have been in the U. M. W. A. "long ago." But where is the underlying general line upon which these actions are based? No answer. The foundain of "wisdom" have run dry. No wonder therefore that these

THERE is this to add: it is relatively easy to change the content of CP work within the reformist unions, once the dual unions are abolished. It is in this sense this new approach may, in the future, become the bridge by means of which the CP will re-turn to a healtby trade union position. The changes in the trade union

Turmoil broke out as a motion to accept the report of the Creden-ials Committee was made and carried. #### Anti-Fascist Editor **Threatened by Fascists**

A sensational charge that various editors of Italian language news-papers, published in this city, have been threatened by gar<sub>1</sub>;sters, been threatened by gargsters, beaten up and warned that their lives are in danger, is contained in a statement published in a re-cent issue of 11 Martello, New York weekly published by Carlo Tresca, well-known anti-Fascist. The newspaper discusses the

well-known anti-Fascist. The newspaper charges that an editor of Stampa Libera, local anti-Fascist daily, has been threatened with violence unless he abandons his present opposition to the policies of Generoso Pope, well known building-supply merchant and publisher of several pro-Fasc-ist dailies ist dailies.

After detailing a whole series of terroristic acts of Pope's strong arm squads against newspaper-men who incurred the disfavor of Pope, II Martello goes on to say:

"During the recent past, a con-troversy has been going on be-tween the editors of La Stampa Libera, anti-Fascist Italian lan-guage daily, and Pope. As far as literary arguments are concerned Pope was getting the worst of it.

"On the occasion of their last visit, the underworld characters in-formed the editor that they would not call again and that the editor should 'know what that means."

Il Martello considers this "an attempt to inaugurate in the Ital-ian colony in the United States the same political regime in the press as prevails today in Musso-lini's Italy" and calls on all to re-sist this Fascist gangsterism.

big the CPO because I believe that thru it I can do most for commun-ism. I did not choose to be expelled from the Communist Party. Had democratic centralism been more than an empty phrase I would not have been expelled. Surely there must be something seriously wrong with the tactical line of a party which cannot stand the acid test of discussion and criticism. If the tactical course is wrong it will go down and deservingly so in the face of critical analysis. Only on the tasts of democratic centralism ean a healthy revelutionary move-ment be built. I hope that the party members will continue the fight for democ-ratic centralism, for the right of communists to hold different tac-tical views inside the party. In joining the CPO, I am fight-ing-not against the party-but party; tacties that are weakening communism and hindering the working class struggle. By joining the CPO I continue the fight for democratic centralism, a Leninist approach to the work-ing class of America, a united communist Party.

Auden deeply suspects that Communism is the way out-but he doesn't quite like it. Only octasionally, moved probably by personal experience, does he find enough inspiration in the working-class to write—and then he can sustain the mood only for a lyric. Spender has absorbed the great tradition of English poetry; his deleate verse, faintly protesting the existence of the poor, sighs in a decidedly pitful fashion. His acceptance of Communism is more whole-hearted than Auden's—but less understanding. Some golden utopia of brotherly love and equal-ity is his vision. Very well, if Spender chooses to spend his time that way, but this is neither revolu-tionary nor proletarian poetry. It is the faint-hearted despairing grasp of a liberal. that "Within the Gates" is a hyorid play, a cross between, the realistic and the fantastic, never being absolutely sure when it is one or when it is the other, cleas-ing in the beholder an insecure emotional response to its own to-patent uncertainties. But, if this play is almost total-ly devoid of dramatic incident ex-cept for an immature but exciting scene between the Dreamer, the Whore, and the Esshop, this some-what fornless work nevertheless brings within our ken some of the most beautiful poetry heard in our time, and the richest satiric humor we have read in any play. It is doubly untorsumate, unectore, that it also contains some of the most distressing moments of shear was-ed opportunities, of which the chorus of the Down and Outs is the most brain when the person of the Young Whore who is forn be-tween the Dreamer, representing the happy, carefree, amoral way or life, and the Bishop who repre-sents the severe respectable and hypocrific at Science and Rel-gion, Established Keligion and thensism, the author providing therewith a running commetary on most of the Law And yet, wise enough to have one of his charac-ters say of England: "Your politics are husks that any derive a two one of his charac-ters say of England: "Your solution and whore's behind a battlement of hunger; but by site will eat, your power's behind a battlement of hunger; but whis bent in two and hope is broken ..." O'Casey uses the only symbol in his play that might have repre-sented the magnificent force of a dranetization of an aware and aroused proletariat, rather as the public so rail those who have lost ath in life or the courage or while to tive. Had he used the Down and outers properly the playwright might have succeded in nutger-ing his play in the moments where a tatak in its of the moments where a tatak in its of the moments where a tatak in the two the courage or while to the have succeded in nutger-ing his play in the moments where a tatak in the twe succeded in nutger-ing his play in the moments where a tatak

that it ought to have. Despite its manifold uncertain-ties "Within The Gates" is far, Iar better fare than Broadway usual-ly has to offer. Indeed, it is not Broadway's child at all, but was, in a manner of speaking, forced upon it, it is sad to think that it had to remain an orphan. Chal-lenging the ingenuity of its pro-ducers by the quality of its pur-mg. Its production is pedestruan baside the flights of the author's work. Except for a really magni-ficent performance by Lillian Gish woo has never before shown any-thing that would indicate the new-degree Mary Morris as the cli Mother (perhaps the most difficult role in the play and the most com-fused) the acting, dancing, and direction are, to put it mildly, ua-imaginative and cull.

O'Casey recently broke loose in the newspapers with the statement that, "If the theatre is only for realism then to hell with it," for-getting no doubt, in this pictur-acque dismissal, that among the finest realistic plays of our time are his own "Juno and the Pay-cock" and "The Plough and the Stars." It is perhaps unfortunate for its presentation on the stage

# Straws in the Wind

MORE than ordinary mid-term election significance must be at-tached to the results of the latest Congressional contests. For the first time in about two generations of American politics a party in power has come back after Presidential elections to strengthen its hold on both houses instead of losing its ground or holding its own

This achievement scored by the Democratic Party in the last election is to be explained by the prevailing situation in the coun-try. In essence the conditions shape themselves up along the fol-lowing lines: There is tremendous discontent in the country. The lowing lines: There is tremendous discontent in the country. The great mass of people is dissatisfied with things as they are and embittered at things as they have been. To the average Join Farmer or Henry American, Roosevelt and his Democratic Parly symbolize to-day a desire to change, a non-acceptance of the status quo, an effort to try something new in order to get rid of, or improve, the old. The adroit political maneuvering of the President, his "fireside talks," his throwing of hundreds of millions of dollars into all sorts of public enterprises for private relief, the stupid stand-patism of the Republican opposition, have all contributed to swelling the size of the Democratic panular vate. size of the Democratic popular vote.

But in this very overwhelming victory of the Democratic Party there are found forces undermining the foundation of the American political set-up—the two-party system. It would be folly to say that the Republican Party is finished. It would be equally false to overlook the all-important fact that the vote polled by the Demo-cratic Party itself is not so much a vote for the Democratic Party as such as a vote going across and beyond party lines.

as such as a vote going across and beyond party lines. This huge vote appeared on the surface as an endorsement of the Administration. Really it is a barometer of the storm that is coming. Great hopes and even greater illusions accompanied this tremendous vote of confidence given to the Roosevelt government. Now that the election contest is over, there is every reason to believe that the Roosevelt administration will proceed in the spirit of the President's address to the Convention of the Investment Bankers Association. Given the so-called mandate, the President, in charge of the Executive Committee of the capitalist class, will move with a firmer and more stable hand. The direction in which this hand will be moving, the body at which its blows will be aimed, will, of course, determine the character of the Roosevelt policies. These will be increasingly more conservative in substance and less radicat even in appearance. This is true despite the fact that the Roosevelt evelt Administration is now prating so much about social legislation. velt Administration is now prating so much about social legislation. Without doubt, the United States, which until recently was along with India and China, one of the very few big countries having no social legislation, is soon to enact some such measures in the very interest of capitalism's self-preservation. These measures will be most inadequate and all efforts will be directed at making the workers pay for them,

Another index of the general discontent in the country and an index having much more significant latent potentialities, is to be found in the fact that in almost all cases where a more radicalfound in the fact that in almost all cases where a more radical-sounding and more left-appearing ticket came hefore the masses, that ticket received the endorsement as against the New Deal. We have in mind particularly the fact that the Farmer Labor Party of Minnesota was able to withstand the onslaught of Farley and his silver-lined tongue orators and gold-lined pocket agents. It is true that the Roosevelt Administration, at the behest of the Invest-ment Bankers Convention, at the last moment, furned on Suclair, double-crossed him, and relieved him of the California governorship. Still, with all the confusion and idiocy characterizing the Sinclair Epic Movement, if must be granted that the many hundreds of thousands of votes piled up for this ex-Socialist are important straws in the wind. These votes have been cast, as in Minnesota, in defiance of the blandishments, as well as the blows of the New Dealers. This is true, tho both Sinclair and Olson tried to outdo themselves in fawning before the High Priest of the New Ordeal themselves in fawning before the High Priest of the New Ordeal-President Roosevelt.

The results of the elections clearly indicate the ripening soil for a mass labor party movement in the United States. The huge vote for the New Deal is a vote for change, a vote for a change for the better which can not be realized, and which, within the coming months, will take a turn for the worse.

A further weakening of the two-party system and the utterly insignificant vote of the Communist and Socialist parties, except in insignificant vote of the Communist and Socialist parties, except in isolated localities, only emphasize the point that the great mass of American workers have yet to break as a class with the parties of big capitalism—the Democratic and Republican parties. The ob-jective conditions for a labor party are now approaching a point of development similar to the situation prevailing in the immediate post-war years. The next months will see increasing interest in and organized, see that is, in the ranks of the great mass of organized, see that is, in the ranks of the trade unions. Classconscious workers, dedicating themselves to the task of advancing the interests of the proletariat as a whole, must lend all aid to stimulating this movement towards a labor party, to hasten this process of the American working class entering the next necessary historically progressive stage, the stage of mass independent political action.

Its official muguzine "The Statient Outlook" is also sub-titled "the intercollegiate Social-tit Review." Some of the chapters in the larger cities even bear the name of Socialist Club In the last presidential elections, Revolt (Vol. I. No. 2, Dec. 1932) informs us loge Thomasfor-President clubs, most of which are now being trans-formed into permanent L. 1. D. chapters or Socialist clubs affili-nete with the L. 1. D." In line with this conception, the last N. Y. In maswer to questions, it was stated that since the S. L. I. D. was af-filined to the I. S. S. P. there is no reason why the same relation should not exast in New York City. The argument is irrefutable, even if the premise is fullacious. The theoretical justification for the present set-up of the S. L. I. D is given by Mary W. Hillyer in the Young Socialist of July-August 1932. "There can be no conflict fetween members of the Lengue for Industrial Democracy and members of the Yipels, In many instances they are one in two! The is the vanguard of a political party endeavoring to establish a new society, a cooperative commion-weith." This type of reasoning wealth." This type of reasoning

### FORWARD MARCH! to the Weekly Workers Age WE RAISED

#### WE NEED \$3,000

For A Weekly Workers Age by January 1st

\$490.55

Our drive to make the Workers Age a weekly is beginning to receive an enthusiastic response. By the time you read the figures below we will be well past the \$500 mark We urge all our comrades and friends to speed up the work in order to make doubly sure of reaching our goal.

- C.T.O. MISMISERS: Pay up your pledge immediately, even if you have to borrow the money to do so. Secure a collection list and approach your fellow workers for contributions.
- Go after your friends for a sub to Workers Age.

C.P.O. SYMPATHISERS: The weekly will be an effective instrument to aid you in your revolutionary activity. Help us realize it! Send your contribution now. Secure a collection list and approach others for donations. Subscribe yourself and get others to subscribe.

# ALL TOGETHER NOW-LET US PUT OVER THE WEEKLY WORKERS AGE BY JANUARY FIRST
